### **DETAILED ACTION**

Claims 1-10, 12-14, 17 and 19-30 are pending in this application.

#### ***Action Summary***

1. The examiner acknowledges the cancellation of claims 11, 15, 16 and 18. Therefore, any and all objections and/or rejections directed to them are hereby withdrawn. The examiner also acknowledges the addition of claims 19-30.
2. The provisional rejection of claims 1-3, 10 and 12-14 on the grounds of nonstatutory obviousness-type double patenting as being unpatentable over claims 50-55 of copending application 10/687,270 is being maintained for the reasons stated in the office action dated December 6, 2006.
3. The rejection of claims 1-10 and 17 under 35 U.S.C. 102(b) as being anticipated by Berry is hereby withdrawn as applicant has amended the claim to overcome the prior art rejection.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 1616

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-3, 10 and 12-14 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 50-55 of copending Application No. 10/687,270. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications are directed towards an article for controlling odor comprising a visual indicating agent that is sensitive to an odor. The difference between the two applications is the type of article used. Since the instant application is broad with respect to the type of article used any article that contains a visual indicating agent that is sensitive to an odor would be obvious.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

#### ***Response to Arguments***

5. Applicant needs to file a terminal disclaimer to overcome the double patenting rejection.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-10, 12-14, 17 and 19-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant has amended claims 1 and 17 to recite that the visual indicating agent has the general formula (I) or (II). However, the way that general formula is written, it is directed to a chemical reaction wherein formula (I) is the starting compound and formula (II) is the end result. It is unclear as to which of the formulas is the visual indicating agent.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 5-7 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones (US 3,650,754).

Jones discloses in example 7, column 7, lines 5-9, a coating composition comprising pararosinline coated onto a polyester base sheet and dried to a thickness of about 8 microns.

Art Unit: 1616

8. Claims 1, 5-7 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Tratnyek (US 4,407,960).

Tratnyek discloses in Table II, column 12, indicator systems comprising a substrate (boxboard or paper stock) and a visual indicating agent (Michler's hydrol; 4,4'-bis[dimethylamino]benzhydrol, col. 2, lines 41-42). Column 6, lines 7-9 teach that a solution of the chemical was applied to the substrate and allowed to air dry.

### ***Conclusion***

9. Claims 1-10, 12-14, 17 and 19-30 are rejected.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
